

The Nexus between Human, Environment and Livestock Interfaces: Investigating the Experiences of Resettled Pastoralists in Ethiopia

Team: **Samuel Tefera**, Debebe Ero, Siobhan Mor

Objectives:

1. To map out the perceived occurrence of zoonotic diseases and
2. To examine perceptions about the causative factors of zoonotic occurrences along with the local treatment knowledge.
3. To identify the health service value chain and pastoralist risk sharing mechanisms for zoonotic diseases along with the effect of non-regulated livestock trade risk in the prevalence of zoonotic disease infection.
4. To investigate how zoonotic diseases affects social bond and support networks systems.
5. To examine into experience of girls/women in the treatment of livestock for zoonotic diseases.
