

Coronavirus disease (COVID-19) pandemic and the impact of mitigation measures on dietary diversity and health outcomes in Uasin Gishu County, Kenya

Sandpit Fellows: Susan Keino, Peter Koskei, Faith Yego

PI: Eric Fevre

Objectives:

1. Describe the context and barriers of adopting government initiatives to mitigate COVID-19
2. Assess dietary diversity among household in informal settlement before and after COVID-19 and assess the impact of selected government initiatives to mitigate COVID-19 on dietary diversity and health outcome
3. To carry out a cross-sectional study among a sample of 174 households with children under-five in Langas ward in Uasin Gishu County.
