

Situational Analysis of Food Safety Control Systems in EAC Member States'

2019- 2020

Objectives

1. Identify previous and on-going food safety investments and evaluate their impact
2. Review food safety control systems in countries within the EA region (e.g. relevant laws, regulations, policies).
3. Review current understanding of, and identify knowledge gaps in major foodborne diseases and their causes in the region
4. Assess stakeholder understanding of food safety

PIs: Delia Randolph & Florence Mutua

Partners: Purdue University

Funding: USAID (FSIL QuickStart) & A4NH

Training on risk assessment was done in 2019 at ILRI Campus in Addis. In 2020, data collection, syntheses, and drafting of multiple reports and publications (on going).

Follow up activities planned in 2021.
