

Herd health

One Health for Humans, Environment, Animals and Livelihoods

Objectives

- 1) Members of pastoral communities are engaged in defining sustainable, demand-driven and need based One Health units
- 2) Context specific, cost effective One Health service delivery models are in operation.
- 3) HEAL-OHUs recognized as a solution for service delivery for pastoralist communities in the Horn of Africa by policymakers and investors

PI ILRI: Barbara Wieland (with I. Baltenweck, J. Sircely, F. Flintan)

Duration: 2019 – 2030

Partners:

Funding: Swiss Agency for Development and Cooperation, with co-funding of various donors (EU, USAID, OHRECA, CRP Livestock)

2020 Highlights

- Analysis of One Health policy context of Ethiopia, Kenya and Somalia
- Community level multi-stakeholder platforms set up to understand community needs
- Various assessment studies completed to inform scope of One Health Units (OHU)
- The first OHUs established
- HEAL Community of Practice with virtual seminars, in collaboration with OHRECA
