Synergies of Animal Welfare and Agroforestry in Ethiopia (SAWA)

Jan 2020 –Dec 2021

Herd Health
Contact: Tsega Berhe, t.berhe@cgiar.org

Objectives

1) Improved performance of targeted agroforestry-livestock systems, incl. improved animal welfare indicators.

2) Animal welfare trainings in agroforestry systems embedded in extension system in Ethiopia

3) Increased evidence-based advocacy for agroforestry-livestock systems

PIs: Rebecca Doyle, Barbara Wieland

Partners: World Agroforestry (ICRAF), University of Melbourne

Funding: Biovision Foundation

2020 Highlights

- Identify appropriate study sites with livestock production in agroforestry system
- Digital survey tool and manual for household survey and animal welfare assessment
- Structure of community conversation training module on animal welfare and managing livestock in agroforestry systems
